Re: COVID-19 Communication

---

As of Monday, March 16<sup>th</sup>, 2020, Wilson County does not have any known cases of COVID-19. The City is working with the Wilson County Health Department and Fredonia Regional Hospital in doing everything possible to operate and communicate in the healthiest and safest methods to minimize any impact on our community. At this time, we are adhering to the KDHE's request of keeping gatherings to 10 people or less, restricting any non-essential travel, and maintaining our commitment to proper hand washing and hygiene. We all need to do our part to stay healthy and reduce the spread of infection. I encourage you to visit the websites of the Center for Disease Control (CDC): <https://www.cdc.gov/coronavirus/2019-ncov/index.html> and Kansas Department of Health (KDHE): <https://govstatus.egov.com/coronavirus> for information and updates.

Our commitment, from the staff to our elected officials, is to keep you informed on a weekly basis of the local battle against COVID-19. Please be assured that we are closely monitoring the situation and we'll keep you fully informed as the situation evolves through our City web site: [www.fredoniaks.org](http://www.fredoniaks.org), Facebook: City of Fredonia Kansas and the Wilson County Citizen Newspaper.

If you are a local business owner, please get with Shannon Thomas, Fredonia's Chamber of Commerce Director, if your business has suffered a negative impact from COVID-19. Shannon has forms and contact information to get connected with the Kansas Department of Commerce for assistance.

Sincerely,

Mr. Kelley R Zellner, CPA  
City Administrator  
Fredonia, KS. 66736
